Summer Enrichment

School aged children enrolled in the summer program took a deep dive into many topics and activities including: career explorations, oragami, karate and self defense, cooking, agriculture, healthy living and of course a lot of fun. In addition to the OSU Extension office, other professionals, like Jim Thomas of US Karate Systems, lent a hand with learning.

Class of 2037 Conquers Pre-K

PMM celebrated the pre-K class as they moved on to Kindergarten this year. A special luau was held for the children and their families. All PMM children passed kindergarten readiness screenings and are prepared for learning.

"I can't say enough good things about Preble Mini Minds. The teachers are patient, caring, and truly invested in every child's growth. In just a short time, he learned so much — from letters and numbers to kindness, independence, and confidence. Every day he came home excited to tell me something new, and it's amazing to see how well they prepared him for kindergarten. It's such a blessing to know he was in a place where he felt loved, supported, and ready to take on the next big step!" – Victoria Combs

Partners for Children

Preble County ESC and United Way hosted Conscious Discipline day with educators from around the county. The 2-day event offered learning opportunities for parents too. Conscious Discipline trains teachers and parents how to develop self regulatory and problem solving skills in children. These are executive function skills that allow children to self regulate and navigate stressful situations.
